

# Prerequisites For Problem Statement

## Problem Statement:

Develop a mobile application using the Flutter framework to create a platform similar to Upwork, facilitating freelancers and clients to connect and collaborate on various projects.

## Prerequisites:

### A) Software Requirements:

1. Flutter Development Environment
2. Integrated Development Environment(IDE)
3. Dart Language Basics
4. OCR associated Libraries
5. Camera Integration
6. Firebase Storage

### B) Hardware Requirements:

1. Laptop/PC (development)
2. Android Phone with Camera

## Network Connection

A stable internet connection is required for:

1. Downloading dependencies.
2. Accessing APIs.
3. Testing network-related functionalities.
